Explore majors

Let's get exploring!

Use this walkthrough to learn about exploring options in Xello.

There are several different paths you can take after high school. Explore all your options to feel confident and ready to take whichever path you're interested in.

If you already have a career in mind, read through the career profile to learn about earnings, workplace tasks, education pathways, and more. Or start with an interactive and engaging school profile. Alternatively, start browsing majors in your favorite school subject.

Tip: You can begin exploring options at any point. For a personalized careers list, complete the **Matchmaker** assessment first. Career matches are based on your answers in **Matchmaker**, so the careers suited to your interests and skills will be listed first. Check out [Assessments and About Me](#) to learn more.

Explore careers

Whether you want to start your journey by exploring careers, schools, or majors, you can start from the **Explore options** area. We're going to start by exploring careers!

- 1 From the top menu, click **Explore**, then select **Careers**. You'll see your top 20 best-matched careers.
- 2 Explore the dynamic filters by clicking **More Filters**. You can narrow the list of careers by salary, education, related school subjects, and more.
- 3 The careers are sorted based on the strength of your match: Excellent, Good, Fair, or Poor.
 - If you don't want to see a career, you can click the three dots on a career card and select **Hide**. Don't worry, you'll be able to find it again in the filters.

The screenshot shows the 'Explore careers' page on the Xello platform. At the top, the navigation bar includes 'Home', 'About Me', 'Explore' (highlighted with a red box and callout 1), and 'Plans'. Below the navigation bar, the 'Explore careers' header is visible. A filter section includes a 'Minimum salary' slider ranging from \$0 to \$125,000+, and an 'Education' section with buttons for 'H' High school, 'C' 2-year college or technical training, and 'U' 4-year college. A 'More filters' button is highlighted with a red box and callout 2. The main content area displays a grid of career cards. The 'Automotive Service Technician' card is highlighted with a red box and callout 4. This card shows an 'Excellent match' (E) with a salary range of \$30,600 - \$77,630 and a status of 'Increasing demand'. Other visible cards include 'Race Car Technician', 'Planner', 'Heavy Equipment Technician', 'Diesel Technician', 'Ironworker', and 'Cycling Service Worker'. Each card features a thumbnail image, a match score (E for Excellent), a salary range, and a demand status (Increasing demand or High demand).

Deep dive on a career

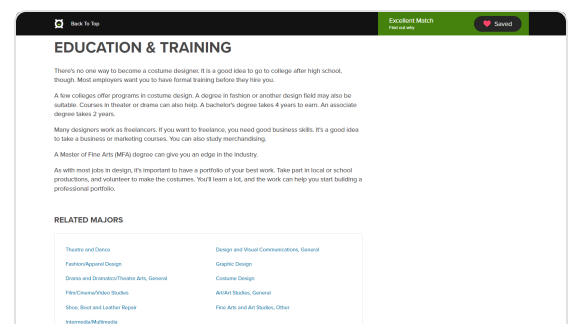

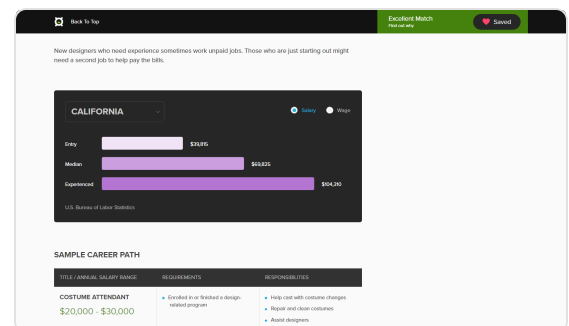

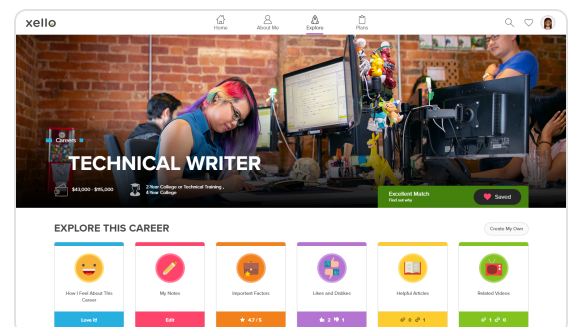

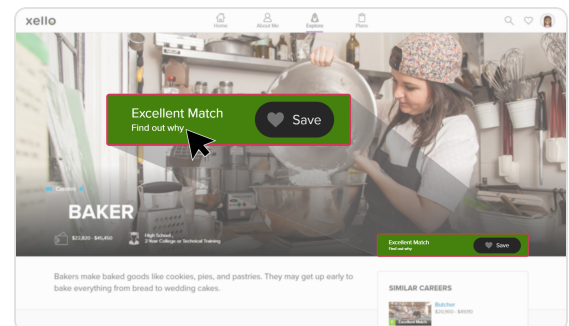

Xello includes hundreds of career profiles written and researched by our in-house team of experts. Each profile contains loads of information to help you learn everything you need to know about that career. Check out salary ranges, job outlooks, and required education levels. Or explore the career paths of professionals who have already achieved success in that area. To view a career profile, click on a career that interests you.

Click **Find out why** to see how the answers you gave in your assessments contributed to your match score. You can change your answers if you'd like. This might change your strength of match. Click **Done** in the top right to return to the profile.

Click the heart icon to save the career as a favorite. Use investigative prompts to record how you feel about the career. This will help you think about why you want to work in that field.

After reading about the core tasks and work conditions, check out the earnings tool. Switch between salary and wage, and change the state to learn the range of how much the career earns.

Read all about education and training for the career. This will help you think about and plan for your next steps in high school and after. Clicking on a related design major will bring you to that profile.

Explore majors

The major profile gives you information about that major, such as a description, typical courses, related careers, and schools that offer that major.

THEATRE AND DANCE
Associate, Bachelor's

In this major, you will study aspects of both dance and theatre arts. You'll learn how these arts are performed, produced, and critiqued. You may study topics like costume design, playwriting, or stage lighting as well. The major is part of the field of drama and theatre arts.

This major is closely related to:

DRAMA AND DRAMATICS/THEATRE ARTS, GENERAL
A play's actors are in the spotlight, but the audience's applause extends well beyond the stage. It takes a lot of effort to mount a play or musical...

Are you looking for a school with a long history of innovation and success? Consider the University of Chicago (UChicago). It was founded in 1890 by the renowned John D. Rockefeller. It's where Enrico Fermi did his famous physics experiments. Physicians completed the first living-donor liver transplant here. Dr. Martin Luther King even made one of his early speeches in the Rockefeller Memorial Chapel...
