

Bringing education and the real world together

With Xello’s WBL module, students can deepen their career exploration by learning about local companies that have partnered with your district, and exploring opportunities to gain real-world experience through job shadows, internships, and more.

An all-in-one CCR & WBL solution

Implementing new software can be challenging. With WBL in Xello, you can reduce onboarding time and training costs with a solution your students and educators are already using to prepare for the future.

Get counselors & teachers involved

Connecting industry and education isn’t a one-person job – it requires a district-wide effort. Invite educators to help coordinate student requests or expand their industry knowledge with teacher externships.

Increase student engagement

Meet your students where they are. Having WBL opportunities accessible in Xello means students can discover opportunities effortlessly as they explore their options, and can indicate interest in just one click.

Stay organized and save time

If you're interested in an opportunity, use the contact information to reach out to the company or your district's WBL administrator to coordinate next steps.
