

Make Student Success a Team Sport

Measure what matters

Give schools, families, and communities the tools they need to know the whole child.

Engage with impact

Coordinate efforts to bring the entire community together to improve outcomes for kids.

Don't just track ... act!

Aggregate and visualize student data that is actionable.

INTELLISPARK

Intellispark Pro

Test scores, graduation rates, and other traditional indicators are useful measures of instructional success, but those data only tell part of the story. With Intellispark Pro you identify the individual needs of each child and engage your entire team in addressing them. By putting human relationships at the core of learning, you'll increase engagement and academic performance.

We are re-defining how schools, students and families, and community-based organizations can work together to prepare successful, future-ready students. By fostering a culture of care, and enabling your team to support all students at scale, we create the conditions where all children can thrive within and outside of school.

Unlike a data dashboard, Intellispark treats data as the starting point for a conversation rather than as an end in itself. Intellispark helps you know the name, face, and story of each student and provides integrated communication and collaboration features that help you take action and to realize a whole-child vision for student success.

Every student needs a team who cares.

Intellispark helps you reach every kid, every day.

Strong relationships are at the core of a quality education. Intellispark Pro helps your team ensure that every student is known, appreciated, and supported — not just academically, but holistically. By enabling you to know students’ needs more deeply, and by harnessing the power of your entire team to address those needs through comprehensive collaboration, communication, and workflow capabilities, Intellispark Pro helps you raise the bar on student performance.

”

Six years ago we started looking at data differently, giving clinicians and educators the tools they needed to stop looking at static reports and to start acting on behalf of kids. Intellispark puts similar, student-centered practices within reach for school districts everywhere.

Great Peer Leadership!
Carla, I loved how you helped your friend today in class. I'm sure that meant the world to her. Keep it up. I'm so proud of you.

Need help?

Prepare future-ready students

Together with our community of schools and districts, the Intellispark platform is re-defining how stakeholders can work together to prepare successful, future-ready students. By fostering a culture of student success where every child can be known, supported, and appreciated, we create the conditions where students thrive.

Every kid, every day

Student success is not binary, often changing daily, weekly, and yearly. Ensuring success requires a focus on every child, every day. With embedded surveys and polls as well as optional research-based assessments, Intellispark makes it easy to check the “pulse” of students throughout the school year — to understand their success skills, career and college readiness, sense of engagement, and connections with faculty and staff. Intellispark gives you a unique, holistic view of each student — clearly identifying risk when it arises and promoting positive encouragement to students who deserve a “high five.”

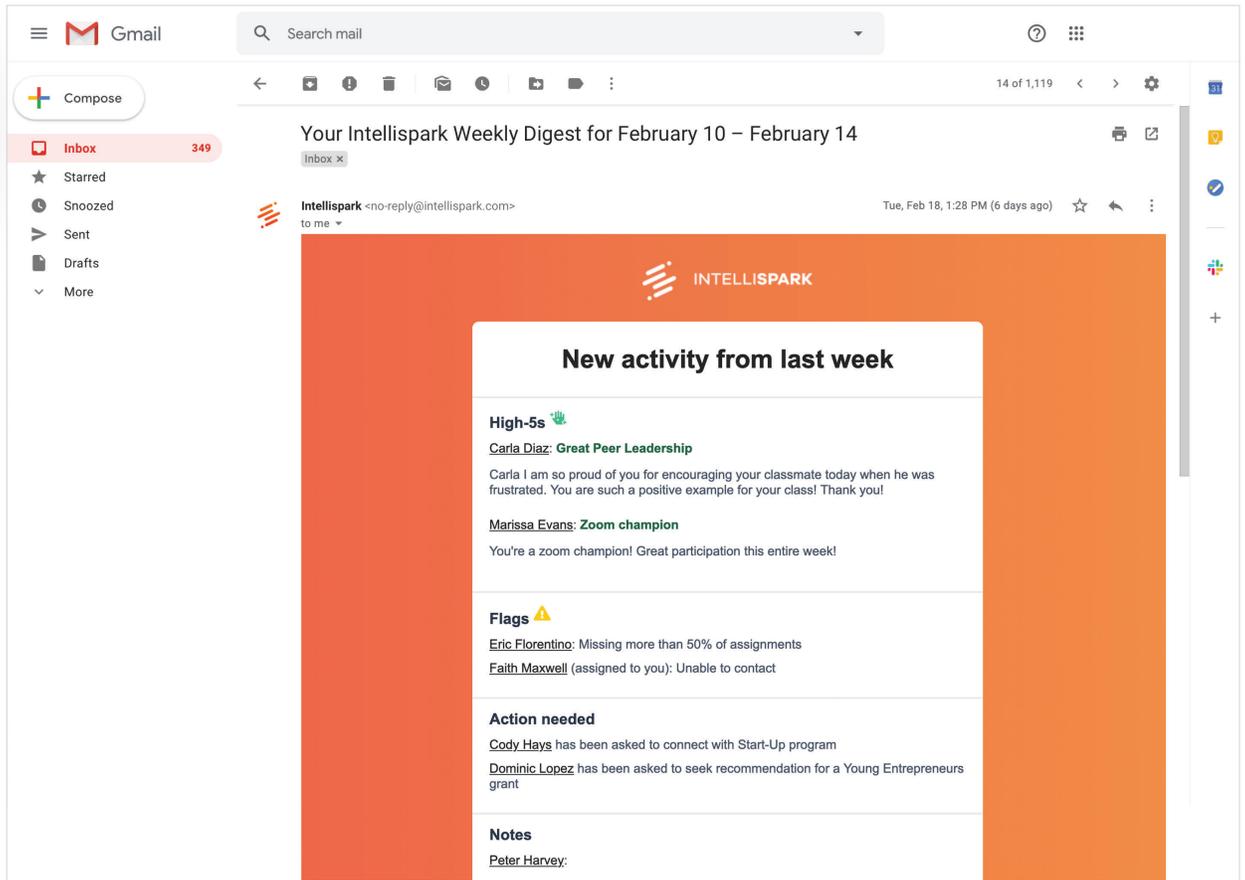

Focus on relationships, and leave the data for dashboards

Teachers and school counselors are relationship-builders, not data analysts. And, that’s how it should be! With simple integrations to existing student records systems, the Intellispark platform makes sense of students’ daily academic performance and other key indicators — sending teachers weekly recommendations of helpful content and techniques to incorporate into their classrooms. The platform includes research-based content packages to help schools integrate and elevate their key initiatives, including social and emotional learning (SEL). Future packages will focus on restorative justice and diversity, equity, and inclusion, among others.

Unify communication and action across the student care team

Every child deserves the support of a connected group of caring adults. Often, student and parent outreach are treated as isolated events, when, in reality, multiple educators may call home about the same observed concern. The Intellispark platform keeps students at the center of their own experience by coordinating these efforts with seamless and secure communications between the teachers, school counselors, students, and parents. The platform includes helpful tools to unify and document communication through and across the student care team — giving every child the best chance of reaching her full potential.

Use Intellispark Pro to elevate student success

- Foster positive engagement between teachers and students
- Support regular check-ins during times of remote learning
- Integrate student performance data from multiple systems
- Conduct a research-based SEL and readiness assessment
- Send data-informed, just-in-time suggestions to teachers
- Unify communication and action for the whole success team

”

Intellispark greatly streamlines our efforts to ensure all students receive the support they need to succeed. It facilitates our ability to build relationships with each student and to work as an integrated team to support their social and emotional needs to advance outcomes.
